

Ardex Innovates Again

For over 50 years ARDEX has been synonymous with the development, manufacture and marketing of premium quality specialist tiling products, flooring products and construction materials for the flooring, tiling and rendering industries.

Based on that reputation ARDEX have added to their array of quality flooring products with the introduction of Ardex FA 20, AF 2510, and K301, the perfect combination for professional flooring.

ARDEX FA 20

This new product is an advanced fibre reinforced smoothing and leveling compound designed to rapidly smooth and level existing substrates prior to applying a floor finish. It can be applied to timber floors and has a rapid hardening property and is walk able after approximately 2 hours. This is a high performance product and is virtually emission free

ARDEX AF2510

This new adhesive is ideal for PVC, rubber, and hardwood floorcoverings. The ARDEX AF 2510 is heat resistant, moisture and weather resistant for wet areas and external use. It is easy to use and apply and solvent free.

ARDEX K301

ARDEX K301 is a self smoothing Levelling and resurfacing compound and has a special fast setting cement-based design, developed to smooth and level rough and damaged concrete surfaces in external situations.

These products are available from ARDEX Building Products Ireland Limited from May 2007.
